

Language Utility

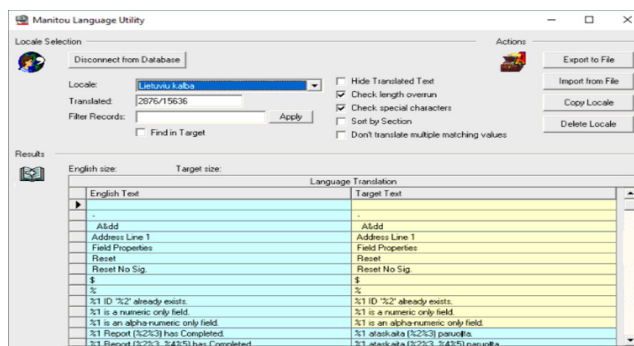

The Bold Language Utility helps you translate your Manitou system into any language or to simply change verbiage in your Manitou system.

Instructions:

1. Locate and Language Utility Shortcut found on the desktop. If it is not on the desktop of the Server, you will need to create it. See the Additional Notes section for these instructions.
2. Select Connect to the Database button on the left side of the application.
3. When prompted, enter SQL admin (SA) password and select OK.

4. In the drop-down, select the Locale from which the translation should occur.
5. It will take a few moments to load the translatable fields. The English Text column contains the default English language fields. The Target Text column contains the translated items. Blue cells have a translation and Yellow cells do not.

6. To filter records by the English or Target text, use the Filter Records field. Enter the intended entry and select Apply to search for the entry.
7. After completing the appropriate translations, close the application.

Additional Notes:

- Creating the Bold Language Utility shortcut:
 - Navigate to the Manitou Installation Directory, usually found under `c:\program files(x86)\Bold Technologies\Manitou\` folder
 - Locate and right click the LanguageUtility.exe
 - Select the Send to Desktop (Create Shortcut)
 - Return to the desktop and right-click the Language Utility shortcut and select Properties.
 - At the end of the Target field, leave a space before typing the word Manitou such as: `"c:\Program Files(x86)\Bold Technologies\Manitou\LanguageUtility.exe"` Manitou
