Sur-Gard	MLR2E	Y
DMP	SCS-1R	Y
Teldat	VisorAlarm	Y
Napco	Net Link	Y
Osbourne Hoffman	2000	Y
AES	7705i	Y

 We are currently working with UL to resolve any outstanding receiver issues and because we have an open project with UL, the local field inspectors will not hold our customers accountable during their yearly inspection. If a customer reports a variance during their inspection, please put a ticket into product control so we can work with UL to resolve the issue and certify the receiver.

We have the following receivers currently in open testing:

Open Testing

Ademco MX-8000

AES 7701
