

## Adding a New Event Map

This document details how to enter a new Event Map into the Manitou Supervisor Workstation.

Steps:

1. Load the Supervisor Workstation and log in.
2. Click the Maintenance menu - Events - Event Maps
3. Edit the form
4. Drop down the list and select SIA
5. Scroll down to the bottom of the page and add a new line
  - Enter the incoming event (Two letter event code for SIA, Contact ID code for Ademco Contact ID, DMP codes for DMP, etc...)
  - Enter 0 (zero) in the Decode Qualifier
  - Enter the Manitou Event Code that it will show to the end user.
  - Description will override the description for the event code name.
  - Attributes = U for user or blank for non-user events.
  - Comments do not display any place other than on this form It is for reference only.
6. Save the record.
