Manitou

Adding Manitou Monitoring Groups

This document steps through adding Monitoring Groups to Manitou.

1. Launch the Supervisor Workstation and Log in.
2. Navigate to the Monitoring Groups form.
    - Maintenance Menu
    - Setup
    - Monitoring Groups
3. Click Edit
4. Click Add
5. Enter a Description and any comments if desired.
6. If the Operator should be in the group at all times, select the Generate warning if Operator not logged onto this Monitoring group.
7. If the Monitoring Group should NOT overflow back to the Main Monitoring group (zero), check the box.
8. Repeat this process as needed to add all the necessary Monitoring Groups.
9. Click Save.

Additional Notes:

Please note! Take time to plan your Monitoring Groups before you add them to Manitou. Please reference the How Monitoring Groups function Quick reference guide for more information.

Monitoring Group overflow allows for signals to filter back to the Central Station when no one is actively monitoring within the additional groups.

Monitoring Groups are a licensed item. To add Monitoring groups to your system speak to your sales representative.
