

Manitou 2.1.38 Hotfix Release Notes

August 2023

Manitou®

Application Corrections

| Resolved Issues |
|--|
| <p>Auto Client not doing actionable items after a variable IF set</p> <p>We resolved an issue where the Auto Client did not know where to go next after an IF action item, and therefore did not complete action items it was capable of completing.</p> |
| <p>Auto Client not doing actionable items after a variable is set</p> <p>We fixed an issue with sub-call lists embedded within a call list that were not contacting the correct contacts and contact points contained on the sub-call list. The correct contacts and contact points will now be shown in embedded sub-call lists.</p> |
