

Adding a Plan

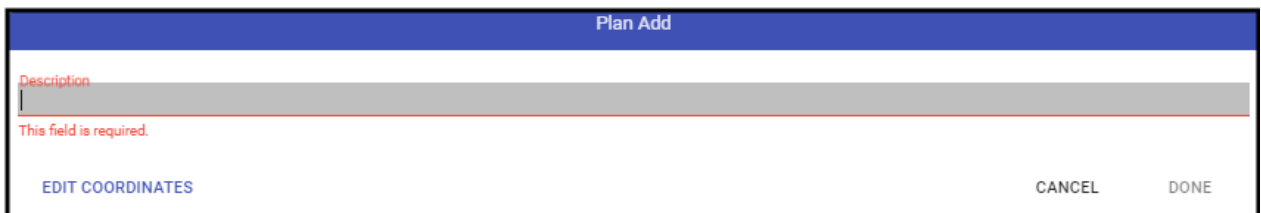

Adding a plan to Manitou consists of three main steps:

- Add a **Plan** - This is the container for the plan layers.
- Add a **Layer** - Layers contain the image files uploaded to Manitou.
- Add **Areas, Points/Zones, Devices**, and the like.

Adding a Plan

1. Click the **Plus sign** (⊕) to add a Plan.
2. Enter the **description of the Plan**. Common names reflect the details of the site, such as "Main building", "Warehouse", etc.

A screenshot of the 'Plan Add' dialog box. It has a blue header with the text 'Plan Add'. Below the header is a text input field with the label 'Description' in red. Below the input field is a red error message that says 'This field is required.'. At the bottom of the dialog, there are three buttons: 'EDIT COORDINATES' on the left, 'CANCEL' in the middle, and 'DONE' on the right.

3. If necessary, select the **"Edit Coordinates"** to set the specific GPS location of the property.
4. Click **Done**.
5. Remember, to **Save** (⊕).

This adds the Plan to the system and enables the Layers for image addition.
