

Adding a Device

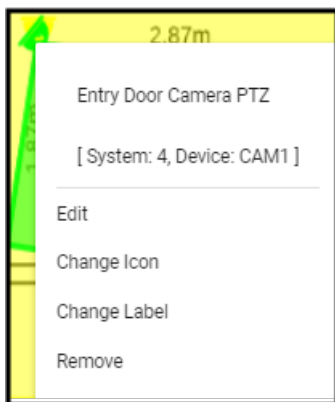

Devices available on the customer record may be added to the plan. Devices in Manitou may include: Cameras, Two-way audio devices, sirens, lights, and the like.

Adding a Device to a Plan Layer

[AddingADevicetoaPlan.mp4](#)

1. With the appropriate layer loaded, **click and drag the device to the plan.**
2. **Release the device** to apply it to the Plan layer.
3. If required, **rotate the device image** to indicate the direction it points at the location.
4. **Right-click to adjust any settings on the device.**
5. Save (⌘) the Record.

Edit a Device

1. **Select the Device.**
 2. **Right-click** the Device.
 1. **Edit** - Allows the movement and relocation of the device.
 2. **Change Icon** - Loads the available device icons to select.
 3. **Change Label** - Changes the description of the device.
 4. **Remove** - Deletes the device and makes it available for other layers or locations on the plan.
 3. Save (⌘) the Record.
