

Linked Views

When a plan has multiple layers, it is possible to link from one layer to another.

[PlanLinking.mp4](#) 

Adding a Link to another Plan Layer

1. With the plan layer selected, select the **Plan link**.
2. **Drag to the location on the Plan.**
3. **Adjust the direction** of the arrow as necessary.

- **Connect** - Loads the linked plan.
 - **Edit** - Allows the movement of the Link.
 - **Change Icon** - Changes the Icon, color, and Increase or Decrease the size as necessary.
 - **Change Label** - Changes the description of the link.
 - **Remove** - Removes the link and makes it available to use elsewhere.
4. **Save** () the record.

Linking between Plans

Clicking the plan link loads the linked plan.
