Types of Reports available in Manitou

Manitou offers a plethora of reports. Based on the needs of the company, Manitou likely has a report to help meet your needs.

Activity Reports

Activity Reports collect information based on the alarms and signals presented to Manitou.

Maintenance Reports

Maintenance Reports relate to the customer data including Access Control, Audit Trail, Billing, Account Addition and Deletion, and Permits.

Master File Reports

Master File reports produce data on all the available records in Manitou. For example, the Customer Master File is a printout of the Customer record.

System Reports

System Reports collect information related to the operations.

Custom Reports

Custom Reports collect customized details related to specific operational needs. For example, if a site bills for excessive signaling, the Custom section contains the Customer Signal Count and Generator.
