Branch Master File

The **Branch Master File** report returns the record details for the Branch, or Branches, selected.

Report Parameters

- **Branch ID** - The branch, or range of branches, to include in the report.
- **Branch Name** - Lists the branch, or branches, name for the record(s) selected.
- **City** - The City, or range of cities, to find the branch(es) to include in the report.
- **State** - The State, or range of states, to find the branch(es) to include in the report.

- **Suppress Passwords** - **Recommended** - removes the passwords configured in Manitou from the report.
- **Page Breaks** - Inserts page breaks between Agencies.

Options

The Report Options allows the inclusion, or exclusion, of the sub-reports and contact list types, to filter and produce a succinct report.

Options
