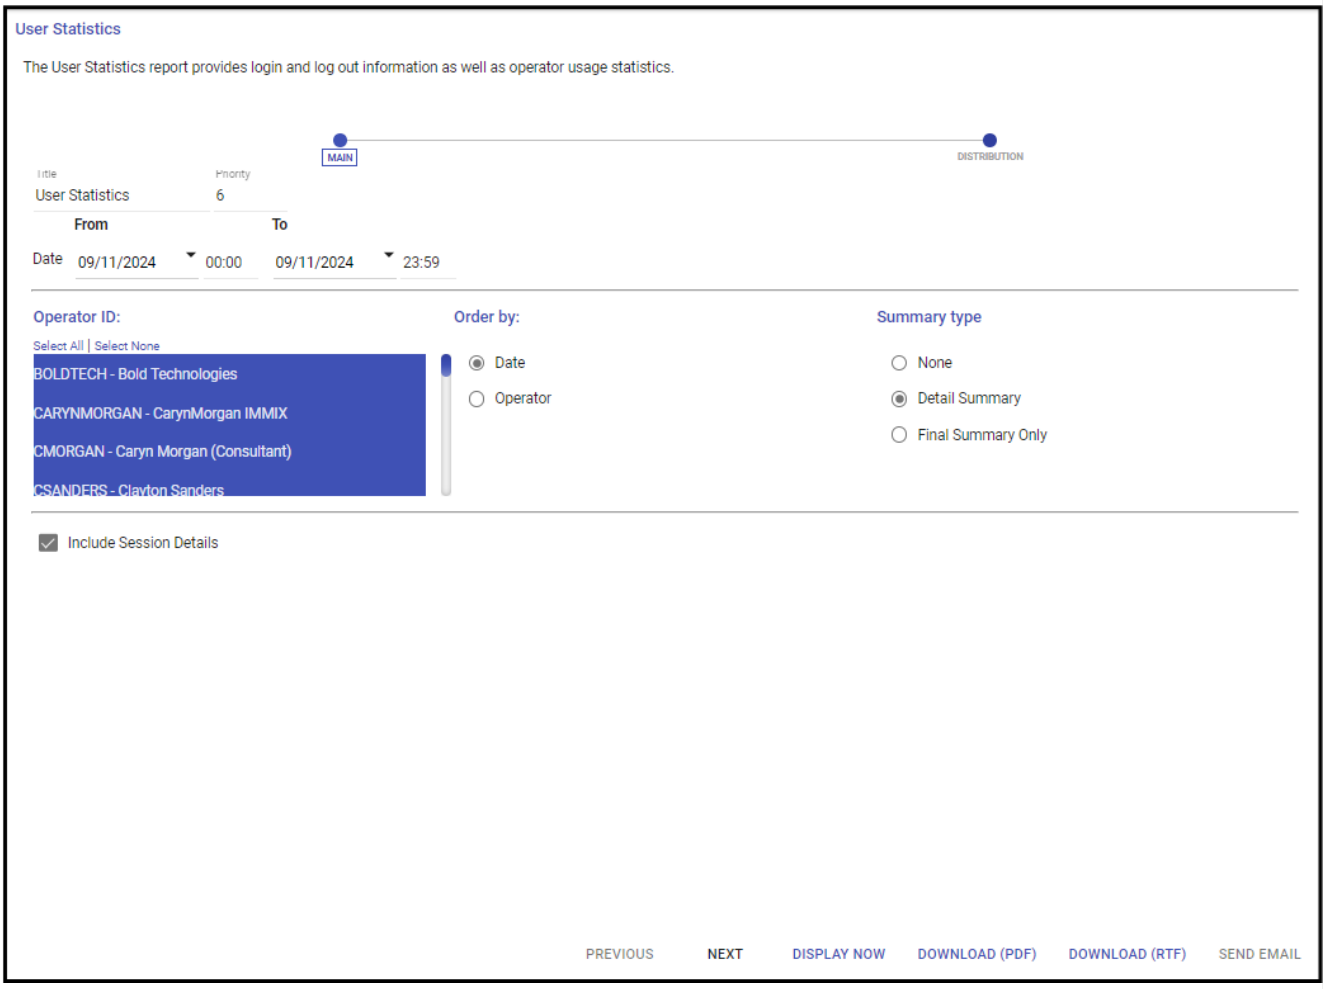
User Statistics

The **User Statistics** report returns statistical information for alarm operations. This is often used to review and establish Key Performance Indicators (KPI) within an alarm operation.



Report Parameters

- **Date** - Determines the date range for the report results.
- **Operator ID** - Selects the Operator, or operators, to include in the report results.
- **Order by** - Determines how to order the report results.
- **Summary Type** - Determines how to return the results.
    - **None** - Does not summarize the report results.
    - **Detail Summary** - returns the hours logged into Manitou, Alarms, Alarms/Hour, Alarms Priority management, account edits, and accounts placed On Test.
    - **Final Summary Only** - Returns only the final details of the Operator statistics.
- **Include Session Detail -** *Enabled by Default* - Includes details of each operator logged in session and the work done while logged into Manitou.
