

# UL Monitoring Layout

If UL monitoring is a requirement, create a **custom UL layout** as follows:

1. On the **Home** page, click **Edit pencil** then **Add Layout**.
2. Create a new layout for UL requirements, for example, *UL Tracking*.
3. Click **Select Details** for the layout. The **Select Data** card appears.
4. Select the **Compliance** option.
5. Select options from the drop-down list and configure these options per company required UL requirements.

The dashboard is divided into four panels:

- Watchdog Messages:** A table with columns for Time, Priority, and Message. A red row shows an alarm at 15:11 with priority 1: "Alarm Progress Problem for 'Late-To-Test' of priority 10 for monitoring group 0!".
- System Statistics:** A line chart with a y-axis from 0 to 10. The x-axis is split into "Manually Closed Alarms" and "System Closed Alarms". The chart shows a blue bar for manually closed alarms and a white bar for system closed alarms.
- Customer System Count:** A summary of customer counts: Active Customers: 57, Inactive Customers: 51, Pending Customers: 0, Deactive Customers: 0.
- Data Table:** A table with columns: Type, Count, Multiplier, MEW Factor.

Type	Count	Multiplier	MEW Factor
Residential	20	0.333	6.66
Commercial Inactive	27	1	27
Commercial O/C	12	3	36
Total			69.66
