

Call Lists

Last Modified on 04/03/2024 6:24 pm EDT

You use this card to add details for all the people, Agencies, Authorities, Dealers, and/or Branches requiring contact for a given alarm. Call Lists are especially useful for commercial sites that might have differing shifts based on the time of day.

A Call List also provides the ability to rotate the members of a list. You often place rotation lists to ensure that one Keyholder is not the only Keyholder contacted each time an alarm occurs.
