

SWS - Forms in the Tools Menu - System Application Log

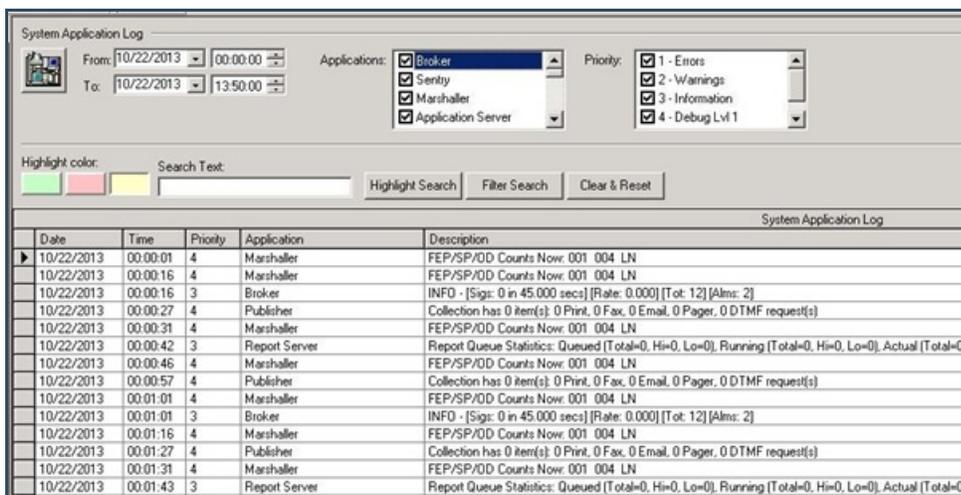

Last Modified on 08/07/2024 11:56 am EDT

The System Application Log allows users to view Manitou application log files. All of the applications in Manitou (e.g., the Broker, Sentry, Marshaller, etc.) report their activities and errors to the log. This information can prove helpful with system diagnostics and maintenance.

To view the System Application Log:

Navigate to the Tools menu and select "System Application Log".

Result: The System Application Log screen displays as shown in the following screenshot:

The screenshot shows the 'System Application Log' window. At the top, there are date and time filters: 'From: 10/22/2013 00:00:00' and 'To: 10/22/2013 13:50:00'. Below these are 'Applications' and 'Priority' dropdown menus. The 'Applications' list includes Broker, Sentry, Marshaller, and Application Server, all with checkboxes checked. The 'Priority' list includes 1 - Errors, 2 - Warnings, 3 - Information, and 4 - Debug Lvl 1, all with checkboxes checked. There are also 'Highlight color' and 'Search Text' fields with buttons for 'Highlight Search', 'Filter Search', and 'Clear & Reset'. The main area is a table with columns: Date, Time, Priority, Application, and Description. The table contains 14 rows of log entries.
