

SWS - Forms in the Maintenance Menu - Control Panels

The Control Panel form allows you to create and maintain a global list of Control Panels in common use across the Manitou system. Once created, Control Panels are available for use in the Customer and Dealer Records.

- Panel Type – The manufacturer's model number
- Description – The manufacturer and model number
- Default Transmitter Type – An optional field that specifies the type of transmitter normally associated with a particular panel

Properties Fields

The Properties area is used to specify the maximum capacities for each particular panel in regards to certain variables. These parameters can be overridden in the customer record if required.

- Max Transmitters - Specifies the maximum number of Transmitters associated with a Control Panel.
- Max Zones - Specifies the maximum number of zones associated with a specific Control Panel.
- Max Areas - Specifies the maximum number of areas associated with a specific Control Panel.
- Max Users - Specifies the maximum number of users associated with a specific Control Panel.

Adding a New Control Panel

Perform the following steps to add a new Control Panel:

1. Navigate to the Maintenance menu, click "Setup" then click "Control Panels".

Result: The "Control Panels" form displays as shown in the following screenshot:

The screenshot shows the 'Control Panels' form in a software application. The form is divided into several sections:

- View:** Contains 'Add' and 'Remove' buttons.
- Control Panels List:** A list of existing panels with the following entries:
 - 2112 - 2112 panel
 - 6112 - Bosch 6112
 - 7112 - Bosch 7112
 - 9112 - bosch 9112
 - BOSCH 7112 - Bosch 7112
 - JACKIE - Testing adding new panel
- Control Panels Form:** Contains the following fields:
 - Panel Type:** 2112
 - Description:** 2112 panel
 - Default Transmitter Type:** AMYS (dropdown menu)
 - Comment:** A large empty text area.
- Properties:** A section with four rows, each containing a numeric input field and a 'No Limit' checkbox:
 - Max Transmitters: 0 [No Limit]
 - Max Areas: 0 [No Limit]
 - Max Zones: 0 [No Limit]
 - Max Users: 0 [No Limit]

2. Click "Edit" then click "Add".

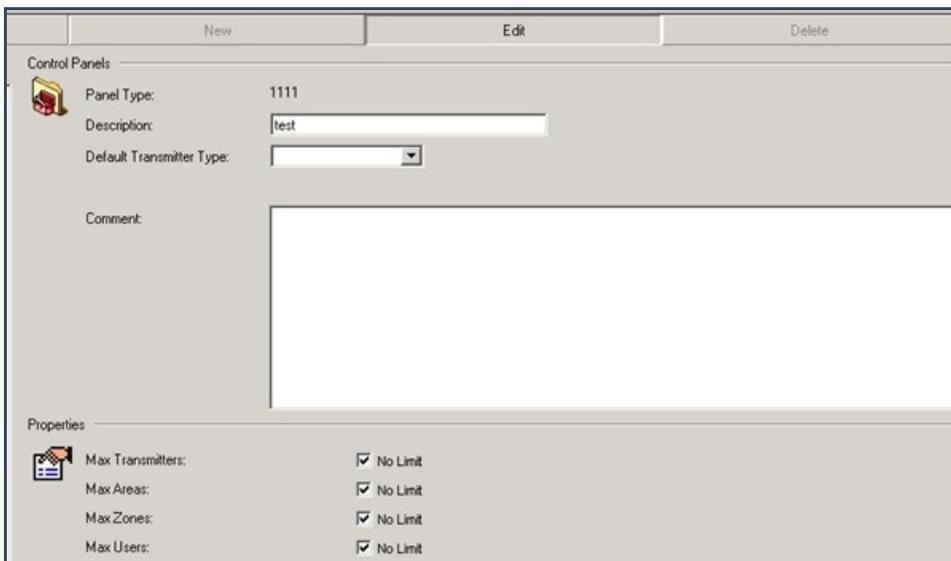

Result: The "Add Panel Type" widow displays as shown in the following screenshot:

The screenshot shows a dialog box titled "Add Panel Type". It contains two text input fields: "Panel Type:" and "Description:". Below these fields are two buttons: "OK" and "Cancel".

3. Enter the panel type into the appropriate field.
4. Enter a description into the appropriate field and click "OK".

Result: Your new Control Panel displays in the list and as the currently selected item on the form as shown in the following screenshot:

The screenshot shows a software interface with a "Control Panels" section. It has three tabs: "New", "Edit", and "Delete". The "New" tab is selected. Below the tabs, there is a form for a new control panel. The "Panel Type" field contains the value "1111". The "Description" field contains the text "test". The "Default Transmitter Type" is a dropdown menu. Below the description field is a large text area for "Comment". At the bottom of the form is a "Properties" section with four rows, each with a checkbox and the text "No Limit": "Max Transmitters:", "Max Areas:", "Max Zones:", and "Max Users:". All checkboxes are checked.

5. Select a Default Transmitter Type from the dropdown menu.
6. Click "Save".
