

New Customer Systems - Devices

Devices are the equipment located at the monitored site, from which operators may access or receive information. Common device examples are Cameras, Audio, 2-Way voice, and other sensors. These are often separate from the alarm monitoring panel but relate to the panel.

The screenshot shows a web application interface for managing a system. At the top, there is a blue header with the text "Add System 1 - System 1". Below the header is a navigation bar with six items: "SYSTEM", "TXS", "AREAS & ZONES", "PROGRAMMING", "DEVICES", and "REMNDS". The "DEVICES" item is highlighted with a blue box. Below the navigation bar is a search bar with a magnifying glass icon and the text "Q". Below the search bar is a table with the following columns: "Id", "TX", "Description", "Type", "Area", and "Zone". The table is currently empty and displays "No Results". Below the table is an "ADD" button. At the bottom right of the interface are three buttons: "CANCEL", "PREVIOUS", and "NEXT".

When necessary, Click Add to add a Device.
