Alarm Billing

The **Alarm Billing** report calculates and returns the Dealer's billing invoice based on the dealer's record details.

This report does NOT require accounting connection to function. Just Dealer Billing details on the Dealer record.

Report Parameters

- **Dealer ID -** The Dealer, or range of dealers, to include in the report results.
- **Mail format** - returns the results with the Dealer's mailing address listed in a way that when folded shows through a standard Window envelope.
- **Include details** - Includes the customer records and individual accounting for their costs.
