

# Add a Compass to a Plan

If necessary, Manitou allows the addition of a Compass to a plan to show the direction of the plan.

## Adding a Compass to a Plan

1. Select the appropriate Plan Layer, then **expand the Compass section**.
2. **Click and Drag** the **Compass** to the Plan.
3. **Release** it to place it on the plan.
4. Right-click and select **Change Icon**.
5. Select the **Color** and **size** of the Compass.
6. Click **Done**.
7. **Save** (?) the Record.

## Editing a Compass

1. **Right-click on the Compass**.
2. Select the **change** to make.

- o **Edit** - Allows the movement and rotation of the compass image.
  - o **Change Icon** - Adjusts the color and size of the compass.
  - o **Change Label** - Changes the text the operator sees in the alarm.
  - o **Remove** - Deletes the compass from the Plan Layer.
3. **Save** (?) the Record.
