

Action Handling - Section Header Start & End

The **Action Handling Section Header** and **End** commands mark off sections of an action pattern that may be expanded and collapsed within the Action Pattern.

The screenshot shows a software interface with a blue header bar labeled "Action Handling" containing a dropdown arrow. Below the header is a list of menu items: "Wait", "Include", "Jump To", "Label", "Section Header Start", and "Section Header End". A horizontal line separates this menu from a white area below. In this white area, there is a blue link "Add Line 2" and a text input field labeled "Name". Below the input field, a red error message reads "This field is required."

The **description** clarifies what is housed within the section.

This screenshot is similar to the one above, showing the "Action Handling" menu and the "Add Line 2" link. However, the "Name" input field is not present. Instead, there is a checkbox labeled "Hidden" located in the bottom right corner of the white area below the menu.
