

Verify UL Value Query

Often, operations have different responses for accounts that are UL (or ULC) certified. This query **determines the UL Value** on the alarm customer's record.

The queries provided should be tested to ensure they meet the customer's specific needs. The company makes no guarantees regarding their accuracy or suitability.

```
SELECT ULGRADE= CASE
  WHEN ULGRADE IS NOT NULL THEN "ULGRADE"
  WHEN ULGRADE IS NULL THEN "NO_ULGRADE"
  ELSE "NO_ULGRADE" END
FROM MONITORING
WHERE SERIALNO={ME}
```

- **SELECT ULGRADE** - Looks to find the UL Grade value found in the MONITORING table.
 - **CASE** - Starts the parameters to seek.
 - **WHEN ULGRADE IS NOT NULL** - looking for a non-null value in the ULGRADE column.
 - **THEN "ULGRADE"** - The returned value when the WHEN value is TRUE
 - **WHEN ULGRADE IS NULL** - looking for null value in the ULGRADE column.
 - **THEN "NO_ULGRADE"** - The returned value when the WHEN value is TRUE.
 - **ELSE "NO_ULGRADE"** - If neither CASE value is TRUE, or not found, the returned value.
 - **END** - Closes the CASE.
 - **FROM MONITORING** - Looks in this table for the ULGRADE value.
 - **WHERE SERIALNO={ME}** - Matches the alarm's customer serial number to the serial number in the Monitoring table.
-
