

Customer Systems - Devices

The **Devices** form within the Customer Systems Transmitter record, contains any devices monitored within that system and transmitter.

The screenshot shows the 'Devices' form interface. On the left is a sidebar with a search bar and a table with columns 'ID' and 'Description'. The top right section contains a list of fields: Device ID, Type, Unit ID, Unit Sub-ID, Address, User, Password, Options, Area, Zone, Link ID, Reverse Route, Disabled, and Web Portal. The bottom right section is split into 'References' and 'Details' panels.

The Devices form contains 4 cards.

- **Devices** - The listing of what devices, cameras, audio, etc., monitored within this system.
- **Device Details** - When selected, the device details of the data entered for the device.
- **References** - If there are reference images for a camera, they may be added for the selected device.
- **Details** - Displays the details related to the References.

See the account creation items related to [devices guides](#) for more information about adding and editing the devices.
