

Enhanced Scripts - Assigning to Action Patterns

Adding a user script to an Action Pattern

1. Load the Monitoring Company.
2. Navigate to Action Patterns.
3. Add or edit the Action Pattern.
4. Select **Data Handling** section then **Show**.
5. Select **Enhanced Script**.
6. Select the **Script** to use.
7. Determine if the data is **committed** and completed upon **launch** or upon **submission**.

The screenshot shows the 'Action Pattern Edit' interface for 'G1 - Global Fire Prompt'. The interface is divided into two main sections: a list of action lines on the left and a configuration panel on the right. The action lines are numbered 1 through 10. Line 5 is highlighted, showing an 'ENHANCED SCRIPT' with a dropdown menu. The right panel shows the 'Enhanced Script' configuration, including 'Set', 'Remark', 'Log Line', 'Enhanced Script', 'External Handling', and 'Logic Handling'. The 'Enhanced Script' dropdown is set to 'User Contact Data Collection', and the 'Complete On' dropdown is set to 'Submit'.

8. Apply.
9. Repeat as required.
10. **Complete** the Action Pattern Changes.
11. **Save** (?) the record.

The screenshot shows the 'Action Pattern Edit' interface for 'G1 - Global Fire Prompt'. The interface is divided into two main sections: a list of action lines on the left and a configuration panel on the right. The action lines are numbered 1 through 12. Line 5 is highlighted, showing an 'ENHANCED SCRIPT' with a dropdown menu. The right panel shows the 'Enhanced Script' configuration, including 'Set', 'Remark', 'Log Line', 'Enhanced Script', 'External Handling', and 'Logic Handling'. The 'Enhanced Script' dropdown is set to 'User Contact Data Collection', and the 'Complete On' dropdown is set to 'Submit'.

12. Test the Action Pattern
